Description	Description Cont.	Description Cont.
<p>On Sunday between noon and 5 pm, Mark West facility next to his house would "blow-off" the compressor every 60 seconds. The prior Thursday evening started around 1 or 2 am until approx. 6as. They did the same thing every 38 - 40 seconds (he timed it with a stop watch). He said on Sunday he saw a "white mist" when they were blowing off the compressor approx 800 yards from his home. 2 years ago Greg Sullivan, Ops Mgr Mark West, came to his house and said "sorry about your luck: in ref to the compressor. Compressor was "built on the sly" 3 yrs ago, the twp (Canton) did not know about it.</p>

Date of Complaint	Date Received Complaint	Date Forwarded	Agency	CFC?	Marcellus Shale?	Congressional?	Controlled Correspondence?	City	State	Alleged Company/Individual	Description	Description Cont.	Description Cont.	Description Cont.
7/20/2012	7/26/2012	8/7/2012	PADEP		Yes			Washington	PA	Mark West Energy Plant	Deliberate release of large quantities of natural gas from the Shaw Compressor Station located off Arden Mine Road on March 24, March 30, June 17 15:00, June 24 15:00, July 3 8:00 & 15:00, July 12 17:00, and July 14, 13:20 2012. These intentional releases continue to plague the area exposing residents to health risks and flammable vapors. Mark West Energy continues to actively ignore the problem and has done nothing to control the discharges.			
11/9/2011	11/9/2011	11/14/2011	PADEP					Houston	PA	Mark West Energy Plant	Black smoke lasting 4-5 min. This happens from time to time. What is the legal amount of time they can release black smoke before it's a violation?			
1/23/2012	1/23/2012	1/23/2012	PADEP		2012-454			Houston	PA	Mark West Energy Plant	Reporting black smoke from Mark West Energy Plant (Houston, PA). "Jet black" smoke was witnessed on 1/20/12, from 11:30 am to 12:15 pm. Complainant believes that this is a Marcellus processing facility. This complaint has been reported to the local EPA several times in the past. The facility is approximately one mile from the complainant's home.			
1/26/2012	2/6/2012	2/6/2012	PADEP		Yes?			Houston	PA	Mark West Energy Plant	Intentional release of large amounts of natural gas vapors from the Shaw Compressor Station located off Arend Mine Road, Chartiers Township, Washington County, PA. These air quality environmental destructive releases have been going on for over a year exposing Chartiers Township residents to health risks and flammable vapors. These deliberate releases have been reported six times to the PA DEP with no action. MarkWest Energy has done nothing to control the discharges. The November 1,2,3,4,5, and 6, 2011 natural gas discharges were extremely frequent with total disregard for the health and safety of area residents. The last known release was January 26, 2012 and the noxious gas vapors were so bad you could not be outside.

<p>Yesterday, I spoke to a gentlemen (Joseph Giovanni - 412-818-4746) regarding a complaint he had about excess air pollution coming from the Mark West Energy Plant. He lives approximately 1/8 mile east of the plant. He told me that there is so much pollution that he cant see the nearby hill side. He claims to be disabled in that he has sensitivity to noise and toxic smells. Regarding noise, he told me that there is allot of "excess" noise between the hours of 10pm and 5am. I told him that both EPA and PADEP do not regulate noise but perhaps you may have had noise complaints from the facility and know what local noise regulations apply to the facility. He also mentioned that there appear to be black plumes at night coming from the plant. that he can visibly see when there is a full moon.</p>	<p>Finally, he told me that approximately 391 ft. from his house, range resources drilled a hydrofracking well and installed 3 huge condensation tanks. He does not have well water as a result of this activity. Mr. Williams of your office is working with him on this issue. I mentioned to him that this situation is probably handled by the oil and gas folks in your office while air pollution at the Mark west Plant would be handled by air quality.</p> <p>Mr. Giovanni will give you a call sometime today. He does not have a computer.</p>		
<p>Tip or Complaint: The MarkWest company operates a railyard for loading rail cars with gas & liquids in Hickory, Washington County, Pennsylvania. A nearby resident to this facility who owns a farm close to there, noticed rail cars burning on Wednesday, Feb. 13th. It was not an accident, staff had the facility told the nearby resident that the rail cars were on fire in some type of cleaning operation. Possibly the situation is that Mark West staff sometimes light the cars on fire to clean out remnant gas or liquids. Resident wasn't certain about why this is done, but it smelled bad, and also appeared to be dangerous.</p>
